Maciej Matulewicz

maciej456@icloud.com | www.maciejdev.com | linkedin.com/in/maciejmatulewicz/ | London, UK

Summary

Web and software developer with over 1 year of development experience and over 4 years of app support experience. Skilled in building projects using React, JavaScript, Python, jQuery, TypeScript, and Node.js. Proficient in SDLC, and clean code principles. Capable of translating UI/UX designs into pixel-perfect responsive websites and applications.

Experience

WYWM Academy | Remote, UK   Sep 2023 – Feb 2024

Software Developer Trainee

Delivered code in Java and Python, and earned certification in software development, testing, and quality assurance.

- Wrote back-end structure for a game using Java; used classes, functions, object-oriented programming (OOP), and correct error handling to simulate a village, structures, and keep track of assets.
- Delivered console-based Python code for an RPG-like in-game character with various data structures, error handling, user input, and more while adhering to the PEP guidelines.

Trilogy Education Services & 2U | Remote, UK / US   Oct 2022 – March 2023

Front End Web Developer Trainee

Delivered various websites and web applications using React, JavaScript, Bootstrap, jQuery, and implemented APIs.

Assisted other developers in resolving programming and technical problems to meet deadlines.

- Developed a travel companion app with fellow developers and used Git, GitHub, and Kanban for project delivery.
- Took on a leadership role in building an API books project, provided code reviews, and helped resolve complex technical problems.

Verisk Extreme Events Solutions | London/Remote, UK   Jan 2018 – July 2021

Technical Services Associate

Planned system migrations and installations by determining specific requirements. Built and sustained strong client relationships, securing optimal satisfaction and long-term retention.

- Developed an internal award-winning PowerShell automation console tool for product configurations.
- Led a time-sensitive project of upgrading users' laptops and migrating data for the entire London office.

Projects

Card Champions © : https://github.com/MrMaciejM/card-champions
- Developed a custom card-battling game from the ground up against a CPU opponent by utilising tools such as React, JavaScript, CSS, HTML, and original assets created in Krita drawing software.

GlobeTrotter: https://github.com/MrMaciejM/GlobeTrotter
- Traveling app that comes with a weather forecast, city data, translation function, and currency exchange APIs to aid during travel.

weather-to-SMS: https://github.com/MrMaciejM/weather-to-sms-app
- A Python app that sends an SMS weather information fetched through an API to your mobile phone.
