Maciej Matulewicz

maciej456@icloud.com | www.maciejdev.com | linkedin.com/in/maciejmatulewicz/ | London, UK

Summary

Web & software developer with over 1 year of development experience and over 4 years of IT experience. Skilled in building projects, including from the ground up, using technologies like React, JavaScript, Python, Java, jQuery, TypeScript, and Node.js. Proficient in SDLC, programming standards, and clean code principles. Capable of translating UI/UX designs into pixel-perfect responsive websites and applications. Effectively work with all colleagues and clients of all skill levels and backgrounds to achieve business goals.

Experience

WYWM Academy | Remote, UK   Sep 2023 – Feb 2024

Software Developer Trainee

Developed projects using Java and Python and earned certification in software development lifecycle practices and quality assurance.
- Developed back-end structure for a game using Java; used classes, functions, object-oriented programming (OOP), and correct error handling to simulate a village and structures.
- Developed console-based Python code for a game with various data structures, error handling, user input, and more while adhering to the PEP guidelines.
- Earned certification in DevOps, software testing, quality assurance, and more.

Trilogy Education Services & 2U | Remote, UK / US   Oct 2022 – March 2023

Front End Web Developer Trainee

Developed many websites and web applications using HTML, CSS, JavaScript, Bootstrap, jQuery, Moment.js, and React, depending on the projects' requirements under strict deadlines. Worked with fellow developers or independently and assisted other developers and senior developers in resolving programming and technical problems to meet deadlines on an ad hoc basis.
- Developed a travel companion app with fellow developers that uses world cities' location and currency APIs and language translation to aid when abroad.
- Led a team in building an API books project, provided code reviews, and helped resolve technical problems.
- Delivered 10 web application projects of various complexity levels under strict deadlines.

Verisk Extreme Events Solutions | London/Remote, UK   Jan 2018 – July 2021

Technical Services Associate

Planned system migrations and installations by determining clear and specific requirements. Built and sustained strong client relationships, securing optimal satisfaction and long-term retention.
- Developed an internal award-winning PowerShell automation console tool for product configurations.
- Led a time-sensitive project of upgrading users' laptops and migrating data for the entire London office.
- Partly managed new apprentices and helped internal and external customers with complex technical issues.

Technical Proficiencies

Software/Tools: JavaScript, TypeScript, Python, Java, Node.js, HTML, CSS, jQuery, APIs, Jest, ChatGPT.

Frameworks/Libraries: React, Bootstrap.

Other: AWS Cloud, SQL, SDLC.

Projects

Card Champions © : https://github.com/MrMaciejM/card-champions
- Developed a custom card-battling game from the ground up against a CPU opponent by utilising tools such as React, JavaScript, CSS, HTML, and original assets created in Krita drawing software.

GlobeTrotter: https://github.com/MrMaciejM/GlobeTrotter
- Companion traveling app that comes with a weather forecast, city data, translation function, and currency exchange APIs to aid during travel.

Weather Dashboard: https://github.com/MrMaciejM/weather-dashboard
- A weather dashboard app that displays current and 5-day forecasts using HTML, CSS, JavaScript, Bootstrap, jQuery, Moment.js, and RESTful APIs.

Certifications

WYWM Academy (2023-2024)

Software Development Certifications (*viewable on my LinkedIn*)

Web Development | Testing Methodologies & Quality Assurance | Java Fundamentals |

Python Fundamentals | Big O Notation | DevOps Fundamentals | Principles of Programming

EDX/Trilogy Education Services (2023)

Certificate in Front-End Web Development
https://skillsbootcamp.credential.getsmarter.com/cedac557-e8aa-49e0-817e-f20ac9eb2ff4

Other: AWS Cloud Practitioner | CompTIA A+ Certified

Academic Highlights

WYWM Academy (Remote)   2023 – 2024
Software Development Certifications (*viewable on my LinkedIn*)
Developed projects in Python, Java, and completed the Software Development pathway.

EDX Front-End Development Bootcamp (Remote)   2022 – 2023

Certificate in Front-End Web Development

Gained proficiency in HTML, CSS, and JavaScrip. Proficient in React and other front-end tools for creating responsive web apps. Learned test-driven development and integration testing for code reliability. Knowledgeable in UI/UX design principles.
  - Achieved an outstanding score of 94% in a rigorous and high-pressure 16-week intensive boot camp.
  - Secured top scores for completing the final project in a timely manner with fellow developers.
  - Developed various apps within strict time constraints.

Verisk Extreme Events Solutions (London, UK)   2016 – 2018

Level 3 Infrastructure Technician Apprenticeship

Achieved Level 3 certification after 12 months of working and studying as an apprentice, and passing BCS Knowledge Module exams, which then paved the way for the final assessment, which I also passed.
